

# Sprite Terminator

Protect your mobile device

## Don't let your private data become PUBLIC! Locate and protect your mobile device in the event of theft or loss

It is reported that up to as many as 1/3 of all mobile devices are lost or stolen each year.

Having personal or corporate data on your smartphone risks leaking you confidential information.

Do you really want your private data, or your employer's data - SMS, contacts, documents etc exposed?

### How can Terminator secure your device & data?

- Find your lost phone- Use GPS to see exactly where your phone is and track it
- Remotely lock, or wipe your data.
- Wipe your phone clean - Don't risk data leaks and embarrassment, Terminator removes all your data so you can sell or decommission your new phone.

### Terminator Features

- Locate your phone using GPS – See exactly where your phone is and track it via Google Maps, or Virtual Earth.
- Set and Forget - Once configured, Sprite Terminator is unobtrusive and can only be uninstalled with the correct password.
- Remote Delete - Initiate the wipe using SMS (including all external storage cards).
- Remote Lock-Down - Send an SMS message to lock all functionality or re-set the device master password.
- SIM Change Alert - Receive a notification SMS message if the SIM card has been changed.
- Activity Retrieval - Send an SMS message to retrieve call log entries

Make the smart choice for your smart device and contact us or your Sprite Mobile reseller today.
